About Me

I am a young professional with **two masters degrees** and a **1+ year experience** as a **Market Intelligence Analyst** at a commodity intelligence SaaS start-up/scale up. During my interdisciplinary studies and work experience, I acquired hands-on experience in **data analysis with statistical methods** along with relevant computer packages and **programming languages**. I can comfortably apply this knowledge to businesses and think beyond the numbers to **provide answers to complex business questions with innovative solutions**.

Academic Background

2019 - 2021

MSc Spatial, Transport and Environmental Economics

Vrije Universiteit Amsterdam, Netherlands

+**Collected data** utilizing stated preference methodology, where a **self-written script** was used to limit the response number.

+Acquired knowledge on **supervised (classification, regression)** and **unsupervised (clustering)** learning methods during **advanced machine learning** course.

+Managed a project, where I was responsible with **data analysis** to find **statistical relationships and causality** with **descriptive statistics** on a dataset containing around **10,000 data points** with a **logit model achieving 96/100.**

+**Trained a regression model**, with the help of **Python** to perform **exploratory analysis, data wrangling, visualisation** and **modelling**, utilising packages such as **numpy, scipy, pandas, matplotlib, seaborn** and **sklearn.**

Thesis: Effect of Covid-19 on Bike Sharing Demand

2018 - 2021

MSc Economics

Eastern Mediterranean University, Cyprus

Thesis: Are Islands Allowed to Announce EEZ or Continental Sea Shelves? (Energy securitization and international economy)

2013 - 2018

BA Economics (with Foundation Year)

Manchester Metropolitan University, United Kingdom

Graduation Project: Role of Euro as a Major Reserve Currency

Technical Skills and Languages

English: Fluent / Turkish: Fluent / Dutch: A1

Python   R-Project   Stata   SQL

MS Excel   MS Power Point   ArcGIS

Professional Experience

December 2021 - Current

Market Intelligence Analyst, Vesper, Amsterdam

+ Work on **market research**, **data analysis** and **hypothesis validation** and **independently developing strategies end to end**

+ R&D of forecasting methods and identifying data patterns
